2	Debris bar	5	Lever for wheel adjustment	8	Upper housing	11	thottle lever
3	Screws for fixing handles	6	Lower frame	9	Spark plug	12	Safety switch

B ASSEMBLY *(starts at page 19)*

C ADJUSTING OPERATION HEIGHT *(starts at page 19)*

D OPERATION *((starts at page 19)*

ARRANGEMENT OF ENGINE

For the setting of the engine, it is necessary to follow the instructions issued by the Engine Manufacturer.

Important! Always work with the debris bag attached and ensure that the hinges for emptying are closed.

E *(starts at page 19)*

ENGINE STARTUP

Once the machine has been assembled start the the engine as follows:

a) *Engines with choke system:*
If the model is equipped with an throttle, when the engine is cold, position the throttle lever (11) on START
Engines with primer system:
Press the fuel-enrichment pump located on the carburettor 3 or 4 times.If the model is equipped with an throttle, position the throttle lever (11) on MAX.

b) Start engine.
MANUAL STARTING:
- Grip the starting handle (10) and pull the pull the engine start grip gently until you feel the resistance caused by compression. Release the handle; then give the starter rope a sharp tug.

CAUTION! *The cooling fan starts turning as soon as the engine is started.*

For further information and explanations, read carefully the Engine Manufacturers instruction manual.

OPERATION

With the engine running: set the throttle (11) on max and push the machine manually. If the suction tube is mounted keep the engine on max firmly grip the tube handle and start operation.

Stopping the engine: set the throttle on stop.
- For maximim efficiency empty the debris bag before the air inlet grill is covered.

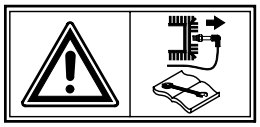
.

F EMPTYING THE BAG *(Fig. 19)*

CAUTION

To empty the bag, proceed as follows:
- stop the machine
- pull out the safety pin
- open the zip and empty the bag

MAINTENANCE



Caution! *Switch off the machine and disconnect the spark plug before undertaking any maintenance work.*

- For a four stroke engine, check oil level and change oil when dirty. For further explanations, see ENGINE INSTRUCTION BOOK.
- Often check the vacuum cleaner, avoiding grass deposits under the deck.
- Pay attention the muffler may be very hot.
- Often remove wheels-screw, clean them with petroleum, and put some oil before mounting them. Do the same for ball bearing wheels; but remember to put grease on the bearings

SAFETY RULES

Training

a) Persons under 16 years of age and persons who are not acquainted with the user instructions must not use the machine.
b) The operator is responsible for the safety of other people in the working area. Keep children and domestic animals at a safe distance when the machine is in use.
c) This machine may be used exclusively for aspirating dead leaves on the ground. Its use is not allowed for other purposes.
d) Work only when there is sufficient light.
e) Before you start using the vacuum cleaner, make sure to remove any objects or obstacles that might be present in the working area. While you are using the vacuum cleaner, keep your eyes open for the possible presence of such objects that may have been left on the ground.

Setting up and operating the vacuum cleaner

a) When using the vacuum cleaner, wear strong footwear (boots or heavy shoes).
b) Turn off the engine and disconnect the cap of the spark plug whenever:
- emoving any objects from the inlet openings
- transporting, lifting or displacing the machine from the working area
- carrying out maintenance or cleaning
- adjusting the working height
- emptying the bag
- leaving the vacuum cleaner unattended.

c) CAUTION! The fuel is highly inflammable:
- keep the fuel only in the fuel cans provided for that purpose
- pour the fuel into the tank only in the open air and make sure not to smoke
- fill up the fuel tank before starting the engine. Under no circumstances open the fuel tank cap or add petrol when the engine is running or when it is still hot
- if the petrol has overflowed, do not under any circumstances start up the engine. Take the machine out of the area where the fuel has been spilt and avoid any source of possible ignition until the petrol fumes have dissipated
- replace the fuel tank cap and tighten it down firmly.

d) The machines with internal combustion engines must never be operated in closed environments on account of the danger of carbon monoxide poisoning.
e) The safety distance, which is set by the length of the handle, must always be kept. Furthermore, when the aspirator is working, never run; you must always walk.
f) Particular precautions must be taken when using the aspirator on slopes or downhill stretches:
- use appropriate antislip footwear
- watch where you put your feet
- always move sideways with respect to the slope; never move uphill or downhill
- take great care when changing direction
- do not work on excessively steep slopes.

g) If in order to transport the machine, you have to lift it up or displace it outside the lawn area, first turn off the engine.
h) Never use the vacuum cleaner with faulty guards or protections or without safety devices (e.g., leaf-collector bag) installed and in proper order.
i) In the case of improper use of the leaf-collector bag device, there exists the danger due to objects being flung around.
j) For reasons of safety, the engine must never exceed the number of revs (r.p.m.) indicated on the data plate.
k) Take care when starting the engine and make sure to follow the user instructions. When the engine is turning, it is absolutely forbidden to prevent anybody from approaching with their hands or toes to the suction opening.

Maintenance and storage

a) Make sure that all nuts, bolts and screws are kept well tightened down so as to work in conditions of perfect safety.
b) Never leave the machine with fuel in the tank where the fuel vapours could reach naked flames or sparks.
c) Give the engine enough time to cool off before putting the equipment in any narrowly enclosed environment.“
d) Keep the engine, silencer, battery compartment and petrol tank free from grass, leaves and excess lubricant in order to reduce the danger of fire.
e) Frequently check the leaf-collector bag for any signs of wear or damage.
f) For safety reasons, make sure to replace worn-out or damaged parts in due time.
g) Should you drain off the fuel tank in order to store the vacuum cleaner away for the winter, make sure to carry out this job in the open air.
